

M-BUS MASTER

M-Bus Master Option Card turns your Jace into a compact Smart Metering System

Technical Data

- Fits into all Jace 2xx, 6xx und M2M models
- Occupies one free plugin slot
- Only one option card per Jace
- Uses the on-board serial port (COM1), the corresponding connector on the Jace will become inoperable
- Connects with up to 10 M-Bus devices
- Integrated short-circuit protection
- Compatible with the Tridium M-Bus driver
- Uses Jace internal power supply
- CE certified

Features

The M-Bus Master Option Card is an extension for all Tridium Jace and M2M devices. This card turns the Jace into a compact and easy to configure Smart Metering System. It can connect up to 10 M-Bus devices, while protecting the Jace from short-circuits on the bus. No additional parts are needed - the card uses the built-in serial port and power supply on the Jace.
